DCX-LINE

*DCX-Line*

DIMENSION-POLYANT's Cruising Laminates were designed for demanding blue water sailors. They combine technical efficiency, durability and easy handling. The special UVM™ coating provides a high resistance against UV and mildew. The new DCX line is a further development of our successful and well proven DC laminates. The core Polyester scrim gains off-threadline support with the insertion of a 9° X-Ply and is encapsulated between two layers of film. The outer taffetas provide a smooth surface and high abrasion resistance. The DCX line is available in various weights and is suitable for most Head- and Mainsails.

sailcloth  
technology

1. Woven taffeta coated with UVM finish protects against abrasion, provides UV stability and minimizes mildew growth.
2. Two-layer film for optimized adhesive bonding and low stretch
3. Strong warp/fill construction for high tear strength and warp stability
4. 9° X-Ply

**green technology  
for sailing**

**Optimum durability and stretch resistance  
for high performance cruising sails**

● **HIGHEST QUALITY, HIGHEST  
TENACITY YARNS & FIBERS**

The fibers in DIMENSION-POLYANT woven fabrics are engineered from high-quality, high-tenacity yarns

● **CONSISTENT CHEMICAL  
MAKEUP IN FINISHING**

Continual research and development with the world's best raw materials results in optimized coatings and finishes

● **CONSISTENT SPECS**

Start-to-finish control over the weaving and finishing processes means consistent stretch and firmness specs

● **FLATNESS**

Wide-width looms designed specifically for sailcloth and climate-controlled weaving plant results in flat, straight fabrics

● **IN-HOUSE CONTROL OF DESIGN,  
WEAVING & FINISHING**

Total control of every step in the sailcloth manufacturing process gives DP wovens consistent top performance

● **WORLD'S LARGEST MAKER  
OF WOVEN POLYESTER**

DIMENSION-POLYANT has more worldwide woven polyester fabric design, testing, construction, and finishing facilities than any other sailcloth producer

- ▶ *improved elongation resistance*
- ▶ *excellent diagonal stability*
- ▶ *highly resistant surfaces*
- ▶ *UV stabilisation*
- ▶ *mildew protection*
