Code Zero Optic 2

This Code Zero laminate can't wait to race. Developed for either the use as light upwind sails or as medium to heavy air reaching sail, the popularity of the once developed for offshore racing fabrics are now gaining in popularity in club and buoys racing too. A Code Zero sail can be compared to an asymmetric spinnaker but is flatter in shape and rather used like a light area genoa. As the conventional spinnaker material mixes do not provide enough stretch resistance to work efficiently in the targeted conditions, Dimension-Polyant has developed a special and super lightweight laminate line to match the requirements. The Code Zero line is unmatched in strength-to-weight use and will more than please both the offshore racer and the performance orientated cruiser.
